ACIBADEM
A CLASS HEALTHCARE SERVICES

Patient Name	KHATIA OZASHVILI
Patient No	42680748
Location	Acıbadem Maslak Hospital
Department	Obstetrics and Gynecology
Physician	Prof. Dr. Faruk Suat Dede

The patient was examined on 13.10.2026 by Prof. Dr. Faruk Suat Dede at the Department of Obstetrics and Gynecology of our hospital due to complaints of vaginal discharge and a sensation of incomplete bladder emptying.According to the patient's medical history, CVS was performed one year ago, the cytology result was reported as normal, and HPV 56 positivity was noted.On physical examination, leukorrhea was noted in the vulva and vagina. The cervix and uterine corpus were normal. The uterus was anteverted and mobile, and the adnexal and parametrial regions were free. Transvaginal ultrasonography revealed a normal, homogeneous uterus. A heterogeneous (hemorrhagic?) cyst measuring 17 × 15 mm was detected in the right ovary, while the left ovary appeared normal.

On 13.10.2026, complete urinalysis and urine culture were requested.Following the evaluation, preliminary diagnoses of acute vaginitis (N76.0) and other and unspecified ovarian cysts (N83.2) were recorded.

On 13.10.2026, the following medical treatment was prescribed:

I - NEO-PENOTRAN FORTE-L 750 MG/ 200 MG/ 100 MG 7 OVULES DIB (One) S: 1 X 1 Intravaginal, duration: 1 week

At night

II - TRIFLUCAN 200 MG 7 CAPSULES DIB (One) S: 1 X 1 Oral, duration: 1 day

Once a week

During the follow-up examination on 16.10.2026, E. coli growth was detected in the urine culture.

On 16.10.2026, the following medical treatment was prescribed:

I - PIYELOSEPTYL 30 CAPSULES DIB (One) S: 3 X 1 Oral, duration: 10 days

II - MONUROL 1 SACHET DIIB (Two) S: 1 X 1 Oral, duration: 2 days With a 3-day interval
